

Methodology Guide

This guide explains how to reproduce the metrics in 02_Metrics_Calculations from 01_Raw_Data: load both CSV tables, filter by sector code, apply the Leontief coefficients and aggregate the ESG indicators by framework.

Framework references: GRI 305 (emissions), GRI 401 (employment), GRI 303 (water), SASB industry standards, IFRS S2 (ISSB) and ESRS E1 / S1 (CSRD). See [source_references.md](#) for links.
